

HYBRID SHOT  
PREMIUM SERIES

# HYBRID SHOT

W ABRASIVES PREMIUM SERIES

This unique steel grit was developed specially to address new demands on the market. By reducing machine wear it helps to **reduce maintenance costs** while at the same time achieving remarkable performance in terms of cleaning. Available under a large range of sizes it is **specifically designed for desanding in foundries and descaling in forges and wire drawing plants.**

## Characteristics

- Specific hardness range
- Elliptic shaped operating mix
- High rebounding capacity

## Performances

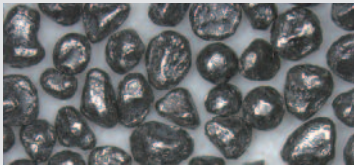

- Low machine wear
- Higher efficiency than shots
- Suitable for complex shape castings

## Applications

- Automotive castings
- Equipment goods
- Construction castings

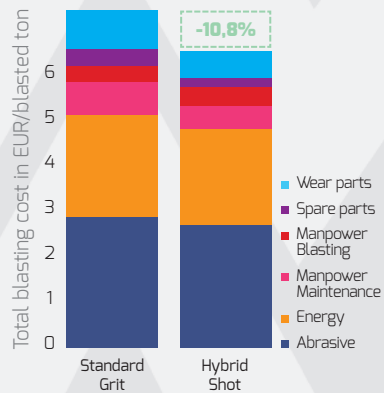

Wear monitoring with WA CAM Technology

Available under a large range of sizes
