

AG-0

Enhance your blocks by improving your performance through a finer granite cutting

AG0 is a fine steel grit dedicated to granite cutting on gangsaws. It reduces the space between 2 slabs by at least 1 mm. Result: more slabs with the same granite block.

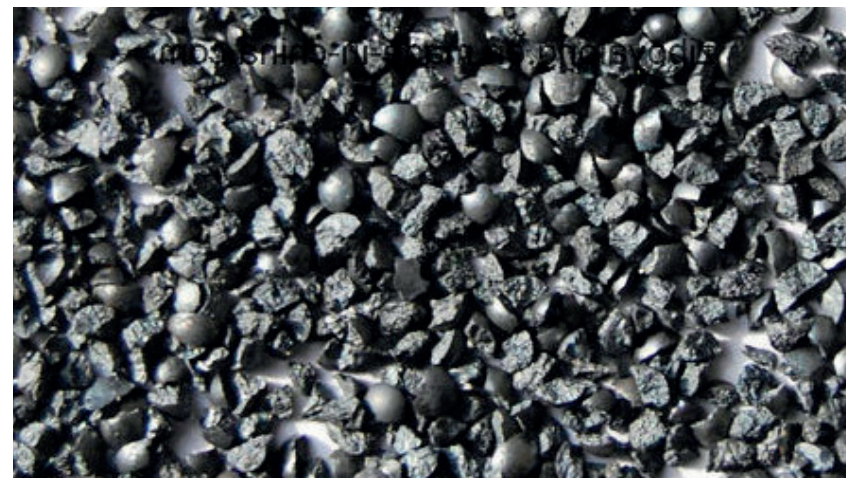

Thin abrasive

Narrow hardness vs Standard Grit

100% Recyclable

USERS BENEFITS

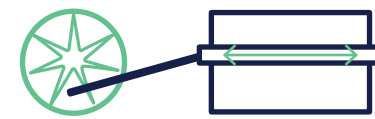

#1 Performance

- Boost your productivity by maximizing the utilization of the raw block material
- State-of-the-Art monitored sizing abrasive product to optimize granite block cutting ratio
- High efficiency granite slab polishing

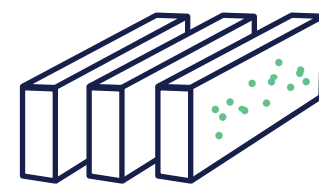

#2 Profitability

- Reduction of steel grit consumption by -5% vs standard grit
- Electricity consumption vs standard process: -4%
- Lower blade attrition
- Lower Lime consumption & Waste production

MARKETS AND APPLICATIONS

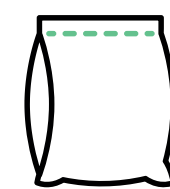

Gang saws

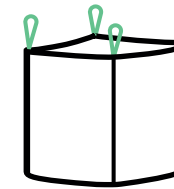

Granite & other stone cutting

Packaging

BOXED BAGS
1500 kg 60 bags of 25 Kg per pallet

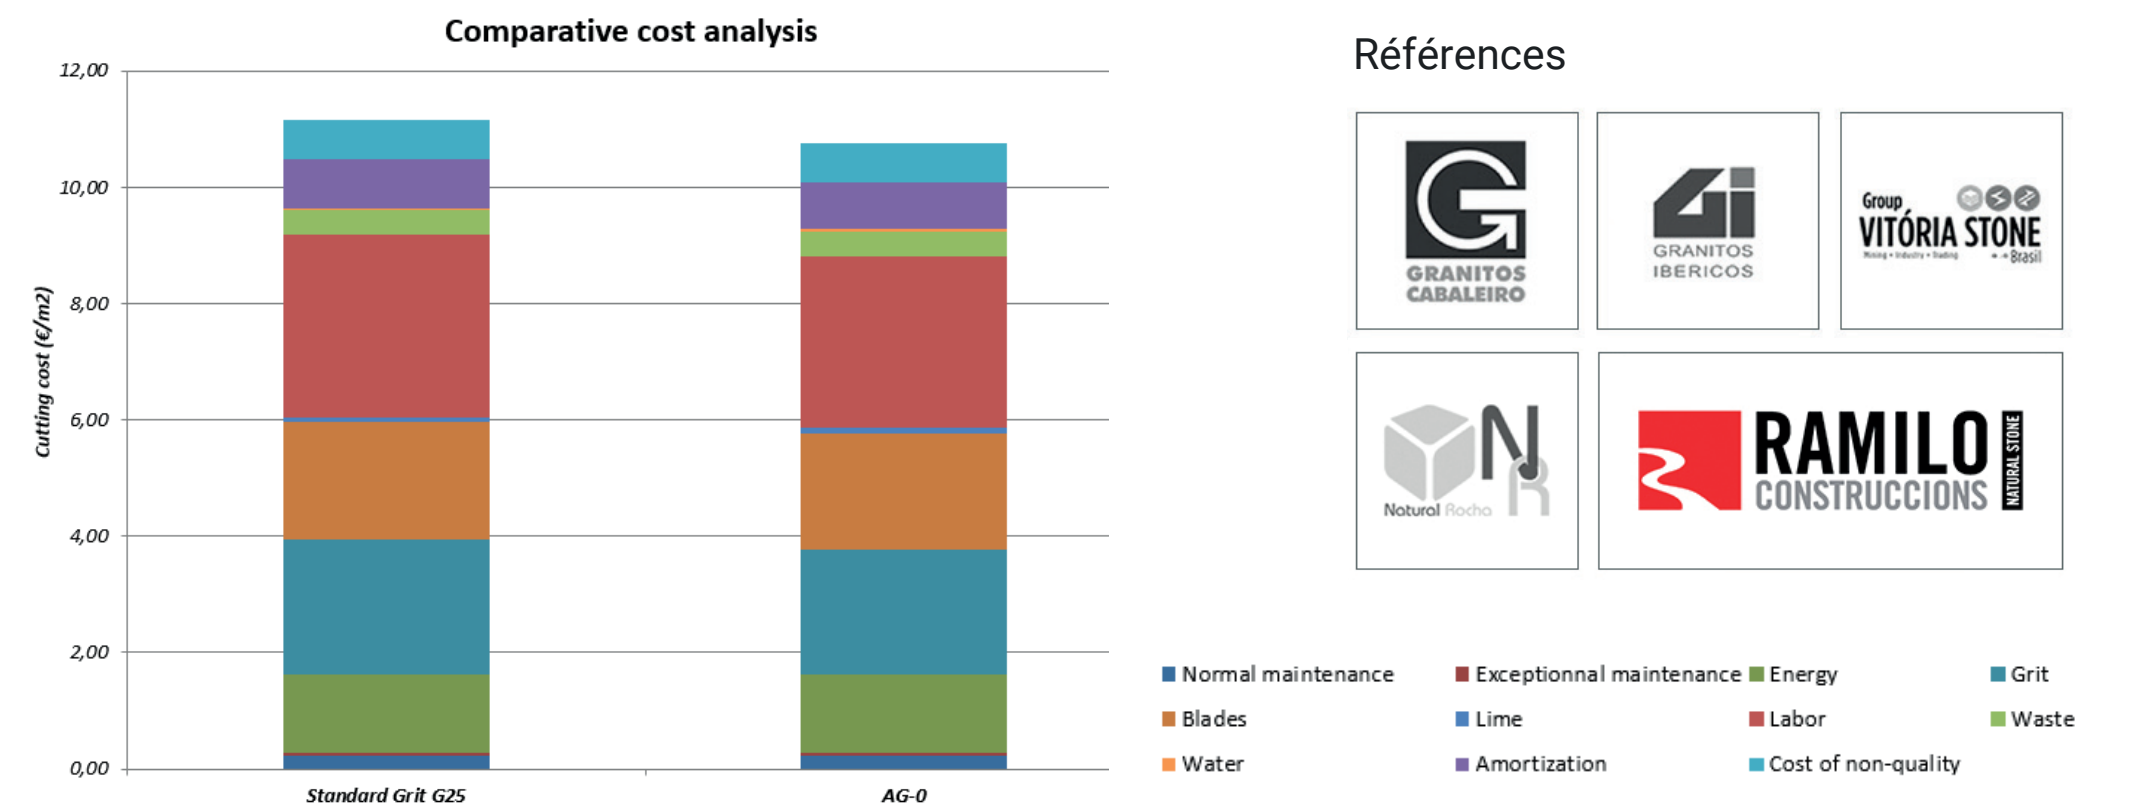

SUPERSAC
1.5 tons

SPECIFICATIONS

Product name	AG-0	AG-0 UT
Stress relief treatment	Single	Double
Normal size (Sieve #)	0,42 mm (#40)	
Hardness	> 700 Hv	
Density	7,6 mini	
Chemical composition	0,8%≤C≤1,2% - Si≥0,4% - 0,6%≤Mn≤1,2% - S≤0,05% - P<0,05%	
General shape	Angular / Grit	

*Document for informational purposes only. Not contractual. Contact your local representative for latest version of the technical data sheets.

Benefits: 4% Total Cost Savings vs Standard Grit !
